

Peel Region Residents Drugged Without Knowledge or Consent!!

- Our Regional Council adds fluoridation chemicals to our water in the belief that it prevents tooth decay.
- The Supreme Court has ruled that adding fluoride to our water amounts to forced medication.¹
- People dispensing drugs and medications must by law have the consent of the people taking their drugs.²
- Regional Council has no authority to force you and your family to take their drug!

Did you agree to be treated with their unapproved fluoridation chemical in your tap water?

- Their fluoride drug of choice contains arsenic and radiation and these things cause sickness and death.³
- These fluoride chemicals have no certificates saying that they are safe (quite the opposite!).³
- A *Harvard School of Public Health* study indicates an intelligence loss from drinking fluoride.⁴
- Drinking fluoride may lead to thyroid disorders and many other very serious health problems.⁵
- Baby formula made from fluoridated water is linked to an overdose condition known as fluorosis.⁶
- Fluorosis first appears as white spots on your teeth and these white spots often turn orange-brown in later years and require costly crowns & veneers to repair.

Who can stop this madness?

- We can, with the support of our Peel Regional Council.⁷

Can you help?

- Learn more about this health threat.⁸
- Get involved and let others know about this danger.⁹
- Email, phone or visit your local councillor and request fluoride free water.⁷

Fluorosis in Peel Region
