Submitted via email to: [OHA.PublicRecords@state.or.us](mailto:OHA.PublicRecords@state.or.us)

Dear Ms. West and Ms. Windham,

This is a formal request for access to general records, made under Oregon's Public Records Law.

**Description of Requested Records:**

All studies and/or reports in the possession, custody or control of the Oregon Health Authority (OHA) describing the purification of any "SARS-COV-2" (including any "variant" of "SARS-COV-2") said to have caused disease in humans (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

**Clarifications re: the above Request**

Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires

host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other small things).

Further, please also note that my request above is not limited to records that were authored by the OHA or that pertain to work done at/by OHA. Rather, my request includes any study or report matching the above description, for example (but not limited to) a published peer-reviewed study authored by anyone, anywhere, ever, downloaded or printed by health officials at OHA and possibly (but not necessarily) relied on as evidence of a disease-causing "virus".

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

**Format:**

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

**Contact Information:**

Last name: [REDACTED]

First name: [REDACTED]

Address: [REDACTED]

Phone: [REDACTED]

Email: [REDACTED]

Thank you in advance and best wishes,

Re: Public Records Request - Studies/Reports Related to Purification of Any  
"SARS-COV-2 Causing Disease in Humans (2021-[REDACTED])

Good Afternoon [REDACTED],

This will confirm Oregon Health Authority received your March 29, 2021 public records request for "All studies and/or reports in the possession, custody or control of the Oregon Health Authority (OHA) describing the purification of any "SARS-COV-2" (including any "variant" of "SARS-COV-2") said to have caused disease in humans (via maceration, filtration and use of an ultracentrifuge; also referred to at times by some people as "isolation"), directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum)." **There are no responsive records to your request. This will complete your request.**
