Dear Chief Horvat,

This is a formal request for access to general records, made under the *Municipal Freedom of Information and Protection of Privacy Act*.

Please note: this request is very similar to another request that I submitted on May 16, 2021 where I had **specified** purification *via maceration, filtration and use of an ultracentrifuge*. The difference with this new request is that it does **not specify** maceration, filtration and use of an ultracentrifuge; instead it mentions filtration, ultracentrifugation and chromatography by way of an example.

Application Fee

I will mail the \$5 application fee to the address listed above. **Please do not mail my cheque back to me this time. If you have no records, please recall that your 2 options that are in accordance with MFIPPA are to either transfer the request to another institution or state that Aylmer Police Service has no responsive records.** Also, please note that I already have confirmation from Health Canada, Public Health Agency of Canada, Public Health Ontario, the Ontario Ministry of Health, all 5 of the Canadian institutions that have falsely aka fraudulently claimed to have "isolated the virus", and institutions in over 20 countries, that they have no such records.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of yourself, Chief Zvonko Horvat, or Aylmer Police Services describing the **purification** of any **"COVID-19 virus"** (aka **"SARS-COV-2"**, **including any alleged "variants"** i.e. **"B.1.1.7"**, **"B.1.351"**, **"P.1"**) (for example: via filtration, ultracentrifugation and chromatography), directly from a sample taken from a diseased human where the patient sample was **not** first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Please note that I am not requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a "genome" by editing/assembling/aligning sequences detected in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please also note that my request is **not** specifically for records that were authored by yourself or Aylmer Police or that pertain to work done at/by yourself or Aylmer Police. Rather, my request includes any record matching the above description, for example (but not limited to): any published peer-reviewed study authored by anyone, anywhere that has been downloaded or printed by yourself or Aylmer Police and relied on as **evidence** of a disease-causing "virus".

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.
