

Information request - FOI/PHE/10/21/21604

From: Michael Warby <Michael.Warby@hertfordshire.gov.uk>

To: [REDACTED]

Date: Friday, October 22nd, 2021 at 20:25

Dear Mr Hobbs,

Reference number: FOI/PHE/10/21/21604

On 21st October 2021 Hertfordshire County Council received the following request for information from you:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the purification (i.e. via filtration and ultracentrifugation and chromatography) of "Zika virus" directly from a sample taken from a diseased man, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and proving a causation between the "virus" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to purify the suspected "virus" (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- ☐ *cultured an unpurified sample or other unpurified substance, and/or*
- ☐ *performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or*
- ☐ *fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or*
- ☐ *produced electron microscopy images of unpurified things in a cell culture.*

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

13/12/2021

(2801)

Your request for information has been considered under the Freedom of Information Act 2000 and I can confirm that after a discussion with our Director of Public Health, that Hertfordshire County Council does hold any information in relation to your subject matter.

If you have any questions, please do not hesitate to contact me, quoting the reference number on this correspondence. To find out more about Freedom of Information, please visit <http://www.hertfordshire.gov.uk/your-council/work/foi/>

If you are unhappy with the way the County Council has handled your request for information you may request an internal review of the request. This will be carried out by a member of the County Council Legal Services Team, who has had no prior involvement with the request. Requests for an internal review should be sent to the Information Governance Unit at the address above (within 2 months of this correspondence) and should detail in writing your grounds of appeal.

If you are unhappy with the outcome of the internal review you are entitled to ask the Information Commissioner to investigate your complaint. You should write to: FOI/EIR Complaints Resolution, Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF.

Yours sincerely,

Michael

Information request - FOI/PHE/10/21/21609

From: Michael Warby <Michael.Warby@hertfordshire.gov.uk>

To: [REDACTED]

Date: Friday, October 22nd, 2021 at 20:25

Dear Mr Hobbs,

Reference number: FOI/PHE/10/21/21609

On 21st October 2021 Hertfordshire County Council received the following request for information from you:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the purification (i.e. via filtration and ultracentrifugation and chromatography) of a "virus" addressed by any vaccine on either the childhood or adult U.K. "immunization schedule", directly from a sample taken from a diseased man, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and proving a causation between the "virus" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to purify the suspected "virus" (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- ☐ *cultured an unpurified sample or other unpurified substance, and/or*
- ☐ *performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or*
- ☐ *fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or*
- ☐ *produced electron microscopy images of unpurified things in a cell culture.*

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e.

Date: Friday, October 22nd, 2021 at 20:24

Dear Mr Hobbs,

Reference number: FOI/PHE/10/21/21610

On 21st October 2021 Hertfordshire County Council received the following request for information from you:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the purification (i.e. via filtration and ultracentrifugation and chromatography) of a "measles virus", directly from a sample taken from a diseased man, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and proving a causation between "measles virus" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to purify the suspected "measles virus" (separate the alleged "virus" from everything else in the patient sample) and instead:-

- ☐ *cultured an unpurified sample or other unpurified substance, and/or*
- ☐ *performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or*
- ☐ *fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or*
- ☐ *produced electron microscopy images of unpurified things in a cell culture.*

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Your request for information has been considered under the Freedom of Information Act 2000 and I can confirm that after a discussion with our Director of Public Health, that Hertfordshire County Council does hold any information in relation to your subject matter.

If you have any questions, please do not hesitate to contact me, quoting the reference number on this correspondence. To find out more about Freedom of Information, please visit <http://www.hertfordshire.gov.uk/your-council/work/foi/>

If you are unhappy with the way the County Council has handled your request for information you may request an internal review of the request. This will be carried out by a member of the County Council Legal Services Team, who has had no prior involvement with the request. Requests for an internal review should be sent to the Information Governance Unit at the address above (within 2 months of this correspondence) and should detail in writing your grounds of appeal.

If you are unhappy with the outcome of the internal review you are entitled to ask the Information Commissioner to investigate your complaint. You should write to: FOI/EIR Complaints Resolution, Information Commissioner's Office, Wycliffe House, Water Lane, Wilmslow, Cheshire, SK9 5AF.

Yours sincerely,

Michael

Information request - FOI/PHE/10/21/21611

From: Michael Warby <Michael.Warby@hertfordshire.gov.uk>

To: [REDACTED]

Date: Friday, October 22nd, 2021 at 20:24

Dear Mr Hobbs,

Reference number: FOI/PHE/10/21/21611

On 21st October 2021 Hertfordshire County Council received the following request for information from you:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the purification (i.e. via filtration and ultracentrifugation and chromatography) of "HPV" aka "Human Papillomavirus", directly from a sample taken from a diseased man, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and proving a causation between "HPV" aka "Human Papillomavirus" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to purify the suspected "Human Papillomavirus" (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- ☐ *cultured an unpurified sample or other unpurified substance, and/or*
- ☐ *performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or*
- ☐ *fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or*
- ☐ *produced electron microscopy images of unpurified things in a cell culture.*

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

Further, I am not requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere.

Information request - FOI/PHE/10/21/21614

From: Michael Warby <Michael.Warby@hertfordshire.gov.uk>

To: [REDACTED]

Date: Friday, October 22nd, 2021 at 20:33

Dear Mr Hobbs,

Reference number: FOI/PHE/10/21/21614

On 21st October 2021 Hertfordshire County Council received the following request for information from you:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the purification (i.e. via filtration and ultracentrifugation and chromatography) of any "COVID-19 virus" (aka "SARS-COV-2", including any alleged "variants" i.e. "B.1.1.7", "B.1.351", "P.1") directly from a sample taken from a diseased man, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovineserum, liver cancer cells) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate proving a causal link between Sars-Cov-2 and the suspected infectious disease Covid-19.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to purify the suspected "virus" SARSCoV- 1 or any of the other common cold associated coronavirus's (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- ☐ *cultured an unpurified sample or other unpurified substance, and/or*
- ☐ *performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or*
- ☐ *fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or*
- ☐ *produced electron microscopy images of unpurified things in a cell culture.*

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am not requesting records describing the replication of a "virus" without host cells.

21 October 2021

Director Public Health
East of England Hertfordshire – Jim McManus

Jim.mcmanus@hertfordshire.gov.uk

This is my wish for access to records.

Description of Requested Records:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the **purification** (i.e. via filtration and ultra-centrifugation and chromatography) of "**Zika virus**" directly from a sample taken from a diseased man, where the patient **sample was not first** combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and **proving a causation** between the "**virus**" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to **purify** the suspected "**virus**" (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things in a cell culture.

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description,

for example (but not limited to) any published peer-reviewed study **authored by anyone, anywhere.**

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

This is my wish for access to records.

Description of Requested Records:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the **purification** (i.e. via filtration and ultra-centrifugation and chromatography) of any **"Ebolavirus" said to have caused disease in humans (i.e. the "Ebola virus", "Sudan virus", "Taï Forest virus", "Bundibugyo virus")**, directly from a sample taken from a diseased man, where the patient **sample was not first** combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and **proving a causation** between the **"virus"** and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to **purify** the suspected **"virus"** (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things in a cell culture.

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study **authored by anyone, anywhere.**

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.
