Dear [REDACTED],

Thank you for your emails received earlier today. We have nothing further to add to the response we've already provided.

If you are not happy with how we've dealt with your request, you can complain and ask us to review our decision. If this is the case, please contact foi@leics.gov.uk, quoting the FOI Request Number (3697). We will usually only be able to consider complaints about requests if they are submitted to us within two months (from the date of this email).

Kind regards,

FOI Team
Leicestershire County Council

Covid: Several Omicron cases confirmed in Rutland and Leicestershire

🕒 7 days ago

Coronavirus pandemic

PA MEDIA

| The county's seven-day Covid-19 infection rate is above the national average

Several cases of the Covid-19 variant Omicron have been identified in Rutland.

Leicester has also had its first case confirmed and there have been **two cases identified in Leicestershire.**

Mike Sandys, Leicestershire and Rutland's director of public health, said all confirmed cases were self-isolating.

He added the **county council was working with the UK Health Security Agency (UKHSA)** to respond appropriately.

On Tuesday the agency said there had been **437 confirmed cases** of the variant, first detected in South Africa, in the UK.

Work is still being carried out to establish how Omicron differs from other variants in terms of severity and transmission rate.

'Expect more cases'

Leicester's first case was revealed by the city council earlier, according to the **Local Democracy Reporting Service.**

Leicestershire's first case was reported in the borough of Oadby and Wigston on Monday and a second case has been detected in the Charnwood area.

Mr Sandys said: "We are working closely with UKHSA to take all appropriate actions and identify any close contacts.

"All those with confirmed cases are now self-isolating, in line with government guidelines.

"It's extremely important residents follow the latest **Covid safety measures** and take every possible precaution to reduce their risk of **transmission.**

Dear [REDACTED]

reminder to request dated 21 OCT 21 as no
response received

We are writing to you in relation to your email sent to the Director of Public Health on 12th December 2021.

Firstly, in relation to the FOI requests we have already responded to (Purification of COVID-19 and Zika viruses), there is no specific requirement within the FOI Act to provide responses on letter headed paper or to physically sign responses. Although requesters can ask for information to be provided in a particular format, in this case, that would not be relevant, as we do not hold the information you have requested. We have already confirmed this to you in writing. Therefore, we will not be providing any further responses in relation to FOI requests submitted previously.

Not "additional" as Mike Sandys only provided response to
Zika from request of 21 OCT 21

Secondly, in relation to the additional requests you have submitted regarding the purification of various viruses (letters dated 20th October 2021), our response is as follows:

n.b. Mike Sandys on BBC claiming evidence Covid-19 variants rampant in County

We do not hold the information you have requested. With regards to reports published in medical journals / databases, we would suggest searching for the relevant reports online.

Please note the above response applies to all the requests you have submitted regarding the purification of viruses. We have dealt with this as one request, as the answer is the same for all.

Before submitting any further requests of a similar nature to the Director of Public Health / the Council, we would advise you to refer to the above response.

publick records/evidences trying to hide fraud

If you continue submitting requests for the same / very similar information, we will consider applying the Section 14 (vexatious requests) exemption. In this case, we would not be obliged under the FOI Act to provide any further responses to your requests, as the Act does not require us to continually respond to repeated requests for the same / very similar information, when we have already stated our position.

Finally, if you are not happy with how we've dealt with your request, you can complain and ask us to review our decision. If this is the case, please contact foi@leics.gov.uk, quoting the FOI Request Number. We will usually only be able to consider complaints about requests if

they are submitted to us within two months (from the date of this email).

Kind regards,

FOI Team
Leicestershire County Council

Date: Sunday, December 12th, 2021 at 19:12

[This Response is inadequate to meet Requests made for virus purification/Response not addressed correctly - please provide all information requested](#)

Dear Director of Public Health for Leicestershire – Mike Sandys,

Please address my request in full * and respond in kind on letter head notepaper with a reference number, referencing the information requests made-a separate response letter for each request made that is dated and signed by whomever is responsible for the decision contained within the response letter 'claims of 'virus' isolation/sickness causation' for the sake of clarity and transparency to the publick.

I have attached Public Health England's response letter by way of example as to how it is usual to respond and lay out the response. Should you require further help on how to respond to requests please let me know soonest.

As evidences/publick record these communications will be placed in the public domain rendering them live. For further clarity as i have submitted more than 1 request to the Director Public Health for Leicestershire – Mike Sandys, including SARS-CoV-1 'virus' purification/causation of sickness in living man, for HPV, INFLUENZA 'virus' and so forth in the last few weeks would they please indicate what request is referred to. I look forward to hearing from you without delay in signed writing.

In sincerity and honour, without ill will, frivolity or vexation,

[REDACTED]

Dear Director of Public Health for Leicestershire Mike Sandys,

Thank you for the response to the Zika VIRUS, please advise on the remaining 9 requests that accompanied it including HPV, Influenza and Polio VIRUS all of which were for purification from a diseased living man and proof of the virus as causation of the sickness.

I look forward to hearing from you without delay in signed writing.

FREEDOM OF INFORMATION ACT 2000 - INFORMATION REQUEST

FOI Request Number: 003521

Description: Purification of Zika virus

Dear Von Hobbs,

Thank you for your request received on 21st October 2021.

Your request (shown in italics):

******Description of Requested Records******

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the purification (i.e. via filtration and ultra-centrifugation and chromatography) of "Zika virus " directly from a sample taken from a diseased man, where the patient s ample was not firs t combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and proving a causation between the "virus " and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to purify the suspected "virus " (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

www.leics.gov.uk

- *cultured an unpurified sample or other unpurified substance, and/or*
- *performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or*
- *fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or*
- *produced electron microscopy images of unpurified things in a cell culture.*

*****Clarification of Request*****

For further clarity, please note I am already aware that according to virus theory a “virus” requires host cells in order to replicate, and I am not requesting records describing the replication of a “virus” without host cells.

Further, I am not requesting private patient information, or records that describe a suspected “virus” floating in a vacuum; I am simply requesting records that describe its purification (separation from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study authored by anyone, anywhere.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

*****Format*****

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the **purification** (i.e. via filtration and ultra-centrifugation and chromatography) of "**HPV**" aka "**Human Papillomavirus**", directly from a sample taken from a diseased man, where the patient **sample was not first** combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and **proving a causation** between "**HPV**" aka "**Human Papillomavirus**" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to **purify** the suspected "**Human Papillomavirus**" (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things in a cell culture.

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

This is my wish for access to records.

Description of Requested Records:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the **purification** (i.e. via filtration and ultra-centrifugation and chromatography) of **"influenza virus"**, directly from a sample taken **from a diseased man**, where the patient **sample was not first** combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and **proving a causation** between "influenza virus" and the suspected infectious disease.

Please note that I am using "purification" in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to **purify** the suspected "influenza virus" (separate the alleged "virus" from everything thing else in the patient sample) and instead:-

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things in a cell culture.

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a "virus" without host cells.

Further, I am **not** requesting private patient information, or records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Leicestershire – Mike Sandys

This is my wish for access to records.

Description of Requested Records:

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the **purification** (i.e. via filtration and ultra-centrifugation and chromatography) of **SARS-COV-1**, as **well as any of the other common cold associated coronavirus's** directly from a sample taken from a diseased man, where the patient **sample was not first** combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells, lung cells from a lung cancer patient) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate and **proving** the **causation link** between Sars-Cov-1 and the suspected infectious disease.

Please note that I am using “purification” in the every-day sense of the word: the act of separating a thing(s) from everything else. Please note that I am not requesting records/studies/reports where researchers failed to **purify** the suspected “virus” SARS-CoV-1 or any of the other common cold associated coronavirus's (separate the alleged “virus” from everything thing else in the patient sample) and instead:-

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things in a cell culture.

Clarification of Request

For further clarity, please note I am already aware that according to virus theory a “virus” requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a “virus” without host cells.

Further, I am **not** requesting private patient information, or records that describe a suspected “virus” floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study **authored by anyone, anywhere.**

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.
