This is my wish for access to records.

### **Description of Requested Records:**

All studies and/or reports and/or records in the possession, custody or control of the addressed body corporate describing the **purification** (i.e. via filtration and ultra-centrifugation and chromatography) of any “**COVID-19 virus**” (aka “SARS-COV-2”, including any alleged “variants” i.e. “B.1.1.7”, “B.1.351”, “P.1”) directly from a sample taken from a diseased man, where the patient **sample was not first** combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum, liver cancer cells) and also studies and/or reports and/or records in the possession, custody or control of the addressed body corporate **proving a causal link** between Sars-Cov-2 and the suspected infectious disease Covid-19.

Please note that I am not requesting studies/reports where researchers failed to **purify** the suspected “virus” (separate the alleged “virus” from everything thing else in the patient sample) and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on the total RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a genome based on PCR-detected sequences in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things in a cell culture.

### **Clarification of Request**

For further clarity, please note I am already aware that according to virus theory a “virus” requires host cells in order to replicate, and I am **not** requesting records describing the **replication** of a “virus” without host cells.

Further, I am **not** requesting private patient information, or records that describe a suspected “virus” floating in a vacuum; I am simply requesting records that describe its **purification** (**separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, for example (but not limited to) any published peer-reviewed study **authored by anyone, anywhere**. This includes your own **website** which claims to have the virus

isolated ; given your body corporate/politick receives publick treasure, the worldwide 'interest' and that more than 100 institutions other have no virus isolate this is for publick record/evidence.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

**Format:**

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.
