Subject: Belgian FOIA Request for the list - Sciensano

Dear Christine,

I have been sending the FOIA request template to officials within the Belgian institutes responsible for the data on covid. Today I received a reply from Sciensano, which would allegedly be the institution responsible for providing us with "cov-id" related data.

I have previously tried to contact UZ Leuven, to which they refer I should try next since they cannot provide the data, but never received a response. I will try again, and see what response I get.

Kind regards,
Max.

Dear Mr DE CLEYN

We have received your request for information of 18 April. This request was made under the law on the publicity of the administration.

We understood you request concerns records that describe purification directly from a primary clinical sample from a patient.

We do not perform such purification within Sciensano, we can detect the viral genome in the primary sample, or isolate the virus (when we know it is positive) in cell culture.

We do not know where such purification information would be available, you may contact the National Reference Center at the UZ/KU Leuven with this question.

Sincerely

Dieter Van Cauteren

Submitted via email to: hsr@sciensano.be

Dear,

This is a formal request for access to general records, made under the *Freedom of Information Act*.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of Sciensano describing the **purification** of the alleged “**COVID-19 virus**” (aka “SARS-COV-2”, including any alleged “variants”) directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Clarification of Request:

Please note that I am **not** requesting studies/reports where researchers failed to **purify** the suspected “virus” and instead:

- cultured something, and/or
- performed an amplification test (i.e. PCR), and/or
- fabricated a genome from sequences (allegedly) detected in an impure substance, and/or
- produced electron microscopy images of unpurified things.

I am already aware that according to virus theory a “virus” requires host cells in order to replicate, and am **not** requesting records that describe **replication** of a ‘virus’ without host cells. Nor am I requesting records that describe a strict fulfillment of Koch’s Postulates, or records that describe a suspected “virus” floating in a vacuum, or private patient information.

I simply request records that describe **purification** (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, **authored by anyone, anywhere**.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access

each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

Contact Information:

Last name: De Cleyn

First name: Max
