RE: Public Records Request

To: The California Department of Public Health

PO Box 997377

MS 0500

Sacramento, CA 95899-7377

Phone: 916-558-1784

Submitted via the CDPH Public Records Portal

Dear **California Department of Public Health**,

This is a formal request for access to general records, made under the *Freedom of Information Act*.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of the **California Department of Public Health** describing the **purification** of the alleged "**COVID-19 virus**" (aka "SARS-COV-2", including any alleged "variants") directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Clarification of Request:

Please note that I am **not** requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured something, and/or
- performed an amplification test (i.e. PCR), and/or
- fabricated a genome from sequences (allegedly) detected in an impure substance, and/or
- produced electron microscopy images of unpurified things.

I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and am **not** requesting records that describe **replication** of a 'virus' without host cells. Nor am I requesting records that describe a strict fulfillment of Koch's Postulates, or records where researchers conflate extraction of genetic material from a patient sample or cell culture with "virus isolation", or records that describe a suspected "virus" floating in a vacuum, or private patient information.

I simply request records that describe purification (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, authored by anyone, anywhere.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

Contact Information:

Last name: Welch

First name: Kristen

Here is my response from the CA Dept of Public Health. I know you already have this one, but thought I would update you with it anyway.

I have sent a Monkeypox request to the Massachusetts State Dept of Health (since that is where it is said to have come from) as well as the Washington, D.C. Dept of Health and Human Services in order to try and help nip this one in the bud before they try to use it against us again.

Hope you have a great weekend!

RE: Public Records Act Request, Reference # P015815-051222

Dear Kristin Welch,

On May 12, 2022, the California Department of Public Health (CDPH) received your request for the following records under the Public Records Act:

FOIA REQUEST PERTAINING TO THE SARS-COV-2 VIRUS

PLEASE SEE THE ATTACHED FOIA REQUEST

CDPH does not have existing documents responsive to this request. However, you may find relevant information to your inquiry at the following link:

<https://testing.covid19.ca.gov/covidnet/>.

Further, additional papers about the isolation of SARS-CoV-2 are available through the NIH at the following link: <https://www.ncbi.nlm.nih.gov/sars-cov-2/>

This concludes our response to this request.

Thank you,

Christa Daley

To monitor the progress, update this request, or download responsive records, please log into the [Public Records Center](#).
