
OIA: SARS-COV-2 Purification and Variants

[REDACTED] Fri, Apr 29, 2022 at 11:57 AM

To: OIA@dia.govt.nz

Greetings Official Information Officer,

Note

Please do not transfer my request to any other organization. I have already received responses from MOH, ESR, NZ Defence Force, Universities and many more. As your office requires a vaccination in order to visit, surely you have valid and direct evidence for the existence of the alleged SARS-COV-2 virus that no other organization on this planet has.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of New Zealand Department of Internal Affairs describing the **purification** of any **"COVID-19 virus" (aka "SARS-COV-2", including any alleged "variants" i.e. "B.1.1.7", "B.1.351", "P.1")** (for example: via filtration, ultracentrifugation and chromatography), directly from a sample taken from a diseased human where the patient sample was not first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

I am not requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- fabricated a "genome" by editing/assembling/aligning sequences detected in the total RNA from a patient sample or from a cell culture or from any unpurified substance, and/or
- produced electron microscopy images of unpurified things.

I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and am **not** requesting records that describe **replication** of a 'virus' without host cells. Nor am I requesting records that describe a strict fulfillment of Koch's Postulates, or records where researchers conflate extraction of genetic material from a patient sample or cell culture with "virus isolation", or records that describe a suspected "virus" floating in a vacuum, or private patient information.

Further, I am **not** requesting records that describe a suspected "virus" floating in a vacuum; I am simply requesting records that describe its **purification (separation** from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

My request is **not limited** to records that were authored by New Zealand Department of Internal Affairs or that pertain to work done at/by New Zealand Department of Internal Affairs. Rather, my request includes any record matching the above description, for example (but not limited to): any published peer-reviewed study authored by anyone, anywhere, ever that has been downloaded or printed by New Zealand Department of Internal Affairs and relied on as evidence of a disease-causing "virus".

Please note, I am requesting all records regardless if the records are publicly available or privately available.

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

Complexity

Please Note, this is not a complex request nor is it a request that will generate too many records to search through. I have already done a preliminary record search through Google Scholar and have read many scientific papers on this subject. I have not found any responsive publicly and privately available scientific records including records referenced and published by the USA CDC.

Kind Regards

--

OIA: SARS-COV-2 Purification and Variants

As you have explicitly advised you do not want your request to be transferred to an agency or entity whose functions relate to the topic of your request, your request is refused under section 18(g) of the Act, as no information about COVID virus purification (or similar) is held by the Department of Internal Affairs and I am not able to transfer your request to the appropriate responder in this case.

Please note that non-health or science related government agencies do not normally engage with public health measures via granular documents such as a virus purification evidence or similar. It is important to recognise also that these agencies usually do not have their own science advisors or researchers who would be in a position to authoritatively evaluate such material. For reference, you can find information about the functions of the Department of Internal Affairs here: <https://www.dia.govt.nz/For-people-and-businesses>

If you are eligible to make an OIA request, and you are not satisfied that a public service agency or entity has appropriately complied with the requirements of the Official Information Act, you are able to lodge a complaint to the Ombudsman, who may choose to investigate the request. You are able to find information about making complaints to the Ombudsman here: <https://www.ombudsman.parliament.nz/what-ombudsman-can-help/complaints-about-government-agencies/how-make-complaint>

Nāku noa, nā
