Phone: (850) 245-4005
Fax: (850) 413-8743
Request submitted via email to: PublicRecordsRequest@flhealth.gov

To The Florida Department of Health,

This is a formal request for access to general records, made under the *Freedom of Information Act*.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of **the Florida Department of Health** describing the **purification** of the alleged "**MonkeyPox Virus**" (aka "Poxviridae Orthopoxvirus", directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Clarification of Request:

Please note that I am **not** requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured something, and/or
- performed an amplification test (i.e. PCR), and/or
- fabricated a genome from sequences (allegedly) detected in an impure substance, and/or

- produced electron microscopy images of unpurified things.

I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and am **not** requesting records that describe **replication** of a 'virus' without host cells. Nor am I requesting records that describe a strict fulfillment of Koch's Postulates or River's Criteria, or records where researchers conflate extraction of genetic material from a patient sample or cell culture with "virus isolation", or records that describe a suspected "virus" floating in a vacuum, or private patient information.

I simply request records that describe purification (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, authored by anyone, anywhere.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:

Pdf documents sent to me via email; I do not wish for anything to be shipped to me.

Contact Information:

Last name: Welch

First name: Kristen

Address: [REDACTED]

Lancaster, CA [REDACTED]

Dear Kristen Welch:

This email is to confirm receipt of your public records request. If this request requires extensive use of resources, this office will contact you again once an estimate of the costs associated with producing the records you seek is prepared. The tracking number associated with your request is in the subject line of this email. If you have any questions, please let me know. Your request was received in this office on 5/25/2022 and given the reference number **P081193-052522** for tracking purposes.

Records Requested: This is a formal request for access to general records, made under the Freedom of Information Act. Description of Requested Records: All studies and/or reports in the possession, custody or control of the Florida Department of Health describing the purification of the alleged "MonkeyPox Virus" (aka "Poxviridae Orthopoxvirus", directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum). Clarification of Request: Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead: • cultured something, and/or • performed an amplification test (i.e. PCR), and/or • fabricated a genome from sequences (allegedly) detected in an impure substance, and/or • produced electron microscopy images of unpurified things. I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and am not requesting records that describe replication of a 'virus' without host cells. Nor am I requesting records that describe a strict fulfillment of Koch's Postulates or River's Criteria, or records where researchers conflate extraction of genetic material from a patient sample or cell culture with "virus isolation", or records that describe a suspected "virus" floating in a vacuum, or private patient information. I simply request records that describe purification (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things). Please note that my request includes any study/report matching the above description, authored by anyone, anywhere. If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

You can monitor the progress of your request at the link below and you'll receive an email when your request has been completed.
