FOI request to Town Of Collingwood re. "SARS-COV-2" purification

Submitted via email to: clerk@collingwood.ca

May 31, 2022

Dear Freedom of Information Officer,

This is a formal request for access to general records, made under the Freedom of Information and Protection of Privacy Act.

Description of Requested Records:

All studies and/or reports in the possession, custody, or control of the Town Of Collingwood describing the purification of any "SARS COV 2" aka "COVID 19 virus" (including any variants") (via maceration, filtration, and use of an ultracentrifuge, also referred to at times as "isolation") directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (ie. Monkey kidney cells, vero cells, fetal bovine serum.)

I am not requesting studies or reports where researchers failed to purify the suspected "virus" but instead:

- Cultured an unpurified sample or other unpurified substance and/or
- Performed an amplification test (ie. PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or

- Sequenced the total RNA from a patient sample or from a cell culture or from any unpurified substance and/or
- Produced electron microscopy images of unpurified things.

I am simply requesting records that describe purification (separation from everything else in the patient sample, as per standard practices for the purification of other small things.)

Please note that my request is not limited to records that were authored by the Town Of Collingwood or that pertain to the Town Of Collingwood. Rather, my request includes any record matching the above description, for example (but not limited to) any published peer reviewed study authored by anyone, anywhere, that has been downloaded or printed by Administration or Staff at the Town Of Collingwood and relied on as evidence of a disease causing "virus."

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty.

FOI request to Town Of Collingwood re. "monkeypox virus" purification

Submitted via email to: clerk@collingwood.ca

June 3, 2022

Dear Freedom of Information Officer,

This is a formal request for access to general records, made under the Freedom of Information and Protection of Privacy Act.

Description of Requested Records:

All studies and/or reports in the possession, custody, or control of the Town Of Collingwood describing the purification of any "monkeypox virus" (via maceration, filtration, and use of an ultracentrifuge, also referred to at times as "isolation") directly from a sample taken from a diseased animal or human, where the patient sample was not first combined with any other source of genetic material (ie. vero cell line, fetal bovine serum.)

I am not requesting studies or reports where researchers failed to purify the alleged "virus" but instead:

- Cultured an unpurified sample or other unpurified substance and/or
- Performed an amplification test (ie. PCR test) on all the RNA from a patient sample or from a cell culture, or on genetic material from any unpurified substance, and/or
- Fabricated a "genome" and/or

- Produced electron microscopy images of unpurified things.

For further clarity, please note I am already aware that according to virus theory a "virus" requires host cells in order to replicate, and that a strict application of Koch's postulates would not be possible even if theoretical "viruses" existed. I do not require records describing the replication of an alleged "virus" without host cells, or strict fulfillment of Koch's Postulates, or a suspected "virus" floating in a vacuum, or private patient records.

I simply require records that describe purification (separation from everything else in the patient sample, as per standard practices for the purification of other small things.)

Please note that my request is not limited to records that were authored by the Town Of Collingwood or that pertain to the Town Of Collingwood. Rather, my request includes any record matching the above description, for example (but not limited to) any published peer reviewed study authored by anyone, anywhere, that has been downloaded or printed by Administration or Staff at the Town Of Collingwood and relied on as evidence of a disease causing "virus."

I require any study/report matching the above details, authored by anyone, anywhere since the alleged discovery of this alleged virus.

If any records match the above description of requested records and are currently available to the public elsewhere, please provide enough information about each record so that I may identify and access each one with certainty.

Hi Chris,

Just wanted to forward my FOI response from the Town of Collingwood to you.

Would you request a wastewater FOI as well?

Or request a formal letter response?

Thank you!

Subject: Access Request A17-2215 and A17-2216 re: Notice of Access Decision

To [REDACTED]

Cc: Sara Almas <salmas@collingwood.ca>, Jennifer Cain-Percy <jcainpercy@collingwood.ca>, Becky Dahl <rdahl@collingwood.ca>

Dear Ms. Clark:

Thank you for your access requests under the Municipal Freedom of Information and Protection of Privacy Act received by Clerk Services on May 31, 2022. The purpose of this email is to provide you with an access decision to the requested records provided in your access request forms attached to this correspondence, specifically related to COVID-19 and the Monkeypox viruses.

Access Decision: In undertaking a search for records applicable to your request, it has been confirmed the Town of Collingwood does not have any records under its custody or control responsive to your requests.

I can however offer the following to assist you in your search:

Any patient sampling in relation to the two viruses you have inquired about is generally conducted by the Province and/or Public Health Unit. The only involvement the Town of Collingwood has had with assisting in sampling, is specific to our Wastewater Treatment Plant who provides wastewater samples from the plant intake to the Ontario Tech University for analysis. The information collected from these samples is used to update a database that is governed by the Ministry of the Environment Conservation and Parks and/or the Public Health Unit. Once the wastewater sample is shipped, the Town does not have custody of the sample or the results in any manner and no data pertaining to the sample is kept by the Town. With that said, we suggest you contact any of the following institutions below who may be able to better assist you in finding the information you are seeking.

- [The Ontario Tech University](#)
- [Ministry of Environment, Conservation and Parks](#)
- [Public Health Unit](#)

You may request the Information and Privacy Commissioner to review this decision within thirty days from the date of this letter. The Commissioner's address is Suite 1400, 2 Bloor Street East, Toronto, Ontario, M4W 1A8. The appeal fee is \$25.00 for general record requests payable by cheque or money order to the Minister of Finance and must be included with your correspondence. To find out more about the appeal process, please visit the IPC website at <https://www.ipc.on.ca/>

The official responsible for making this access decision is Sara J. Almas, Clerk/MFIPPA Head. If you have any questions, please do not hesitate to contact Clerk Almas by email at salmas@collingwood.ca or by phone at 705-445-1030 ext. 3225.

Kind regards,

Becky Dahl, Dipl.M.M.
