To:

Hello Everyone,

In response to today's Lazarus Initiative I have posted the following video and encourage everyone to participate in an actual presentation of facts.

<https://rumble.com/v1h1r1x-the-lazarus-initiative.html>

Terrain: Provide documented evidence of research showing 5G interacting with people causing the production of SARS-CoV-2, as well as any evidence you might have showing published research that the drug vaccine biologics for SARS-CoV-2 have nanotechnology that is influenced by 5G.

Participants: Kaufman, Young, Massey or Cowan. I don't have Kaufman's current email address; hence, it is missing from the above cc'd.

Germ: Provide documented evidence of research showing the presence of SARS-CoV-2 taken from patients including EM and/or nucleotide base sequences, as well as evidence of Gain-of-Function viruses paid for by U.S. Funds.

Participants: McCairn, Kirsch, Fleming

Looking forward to hearing from everyone.

All my best,

Dr. Fleming

Hi Everyone,

My message to the world has consistently been that SARS-CoV-2 has never even been shown to exist, and I am not known for discussing the fake "vaccines", 5G or nanotechnology. So asking me to show that 5G causes "SARS-COV-2" production, or to discuss the jabs (other than the fact that they are 100% fraud-based), makes zero sense... which seems par for the course with Richard Fleming.

Richard promotes the point-and-declare approach to virology, as highlighted in a recent webinar by Tom, @47:15: <https://www.bitcute.com/video/rekrHZ52IKZy/>

Richard also put out a video back in March wherein he:

- insisted "*we know it exists because we sequenced it*"
- implied that the existence of bronchoalveolar lavage fluid samples is controversial
- showed a video of the technique for extracting bronchoalveolar lavage fluid from a patient and labelled this "OBTAINING SARS-COV-2 FROM THE LUNGS"
- insisted that PCR "tests" are legit

<https://rumble.com/vwqkml-18-pieces-of-misinformation-you-need-to-know..html>

What a nut.

The real reason I now refuse to debate Steve Kirsch (hint: it's not what Steve tells his readers)

"I will soon be compiling and publishing all of the recent emails between myself, Steve Kirsch, Richard Fleming and Kevin McCairn, here in a pdf. I am blocking all three of these "men" from my life, forever. Below is an example of why..."
<https://www.fluoridefreepeel.ca/why-i-now-refuse-to-debate-steve-kirsch-or-richard-fleming-or-kevin-mccairn/>

Cheers,
Christine

Hello Everyone,

This is a sad reflection of our inability to have an objective discussion that is desperately needed and wanted by people. Ms. Massey, I am disappointed in your response and hope you will put these personal issues aside for the benefit of the people.

Respectfully,

Dr. Fleming
