

Restoring Science: How We Can Reclaim Objectivity and Protect the Public from both an Anti-Science Backlash and Corporate Greed

Reviving the Power of Science to Transform Lives and Protect Public Health will Require All of Our Efforts

Science has been a pillar of human progress for centuries. From the Renaissance to the Industrial Revolution, science has been at the forefront of the human experience, advancing our knowledge and understanding of the world around us. Science has been our vehicle on our journey of exploration we dared to asymptotically approach the truth.

Recent events, however, have tarnished “the reputation of Science”, and we must brace ourselves for a hurricane torrent of anti-scientism that hopefully can, itself, be channeled, reformed, and redirected at the right targets: those who were never practicing Science in the first place.

Fauci has not tarnished the reputation of science; Fauci has tarnished the reputation of Fauci.

Some are saying that the reputation of science is forever tarnished. I would say that the reputations of those who were masquerading as scientists are now properly adjusted. Purveyors of science do not lie, cheat and steal. Scientists admit when they

Christine Massey FOIs Writes Christine Massey's "germ" FOI N... 2 hr ago

Hypocritical much, James? You've defended the blatant pseudoscience of virology all along.

Thank you for your opinion. However, the extent of the madness of those who write entire textbooks on Virology, who conduct their entire professional careers, and the databases filled with millions of sequences, and many, many other lines of evidence remain to be explained by virus deniers. See <https://binged.it/3lxTq7A>

It's not opinion, it's fact.

Logic fallacy, much? There are many lines of evidence for Santa Claus too, James. Does that make him real?

Cite actual science if you can, since you claim to be a scientist.

Incorrect. Therein lies onr fatal flaw. You refuse to explain all of the positive evidence you reject, and pretend the evidence doesn't exist. There is no coherence to your logic.

You're reading from the Jay Couey script, I see. No one is denying the existence of:

- sick people
- sequences of unknown provenance
- tiny particles in monkey/cow/human/bacteria/fungi concoctions
- made-up in silico codes fraudulently labelled as "genomes"
- unnatural animal experiments that don't even have a valid independent variable
- never-validated, impossible-to-validate "tests"

There is no science. Prove me wrong if you can. Cite the science that you rely on and let's go from there.

We've already done this.

Have you read and debunked the thousands of studies I have sent you yet? By ignoring the evidence you demand, you impeach any of the following: your ability to use logic, your motives, your ability to understand science. I'll take any 2 out of 3.

♡ LIKE 💬 REPLY (1)

Lol, you gave a link to internet search results for "virology text book".

Here are the search results for "Santa Claus book", with 2, 230,000 results. It proves that Santa exists, right?

[https://www.bing.com/search?](https://www.bing.com/search?q=Santa+Claus+book&q&qs=n&form=QBRE&sp=-1&ghc=1&lq=0&pq=santa+claus+book&sc=10-16&sk=&cvid=39EE76EA4094479DA0B559BE92A65CC6&ghsh=0&ghacc=0&ghpl=)

Are you afraid to cite a specific study b/c you know it will be torn to shreds?

Would you accept a link to search results for "vaccines are safe" as proof of quackcine safety?

Cite a study, let's do this.

Your analogy is non sequitur. None of the Santa Claus books are meant as sincere academic exercises. Again your logic is weak and nearly incomprehensible. And your citation of Santa Claus books to disprove the entire contents of all virology books ever written is an example of the ludicrous non-logical "evidence" you use.

♡ LIKE 💬 REPLY (1)

Christine Massey FOIs Writes Christine Massey's "germ" FOI N... just now

No it's not. Internet search results for books about "viruses" are not proof of "viruses".

How the books are meant is entirely beside the point. Intentions aren't science or proof of viruses. And I didn't use the existence Santa Claus books to disprove anything. I used it to show how silly your approach to "science" is. Anyone can follow that logic. Enough of the gaslighting and attempts to reverse the burden of proof. Cite a study if you can.

Yes it is typical of a scientist with a memory to remember that I already sent you science that you ignored.

What makes you think that I would not expect you just to ignore or out of hand dismiss any science that I send to you? I'm sure you know how to use pubmed, if not I'll be happy to provide you a free lesson.

You claim that I posted virology textbooks as evidence that viruses exist. In reality, I posted virology textbooks as evidence supporting the statement that there must be widespread Madness Beyond Belief specifically that you cannot explain about why for instance so many people would write so many textbooks has just one of many lines of evidence of some Madness that must be going on now for decades and decades and decades. So if you feel like it please explain that was my challenge rather than evidence that the virus exists. There's ample evidence that the virus and other viruses exist. You are refusing to explain these other lines of evidence as if you have no responsibility for your claim that viruses don't exist. And that is particularly problematic.

James, after you sent the internet search link (and only that link), you wrote "Science sent. You ignored it". Later I wrote "Cite a scientific study" and you responded with "Done". So no, I didn't take anything out of context.

Site a scientific paper and let's see those "other lines of evidence" so that I can comment on them? I've been asking you to over and over again. You remind me a lot of CHD's "science" consultant Jay Couey, by the way.

My evidence for the claim that viruses (measles virus, HIV, HPV, etc, etc, etc) don't exist is:

- the virology literature and
- the hundreds of SARS-COV-2 FOI responses from 40 countries, 213 institutions, and the dozens of FOI responses on other imaginary viruses. Virologists have had over 100 years to prove their claim, despite all the new fancy technology.

Freedom of Information Responses reveal that health/science institutions around the world (212 and counting!) have no record of SARS-COV-2 (the alleged covid virus) isolation/purification, anywhere, ever:

<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-around-the-world-have-no-record-of-sars-cov-2-isolation-purification/>

FOIs reveal that health/science institutions have no record of any "virus" having been found in a host and isolated/purified. Because virology isn't a science:

<https://www.fluoridefreepeel.ca/fois-reveal-that-health-science-institutions-have-no-record-of-any-virus-having-been-isolated-purified-virology-isnt-a-science/>

Do virologists perform valid control experiments? Is virology a science?

<https://www.fluoridefreepeel.ca/do-virologists-perform-valid-control-experiments-is-virology-a-science/>

<https://www.fluoridefreepeel.ca/do-virologists-perform-valid-control-experiments-is-virology-a-science/>

James Lyons-Weiler ✓ 9 min ago 🚩 Author

You don't remember our last conversation where you ask for Science and I sent it? That's why I said "Done."

You tossed it off like it was nothing. As memory serves it was about whether virologists use controls in their study design and I sent you a link to thousands of studies in virology where they use controls? And that was not sufficient for you to change your position and so no amount of evidence will ever satisfy you. There is nothing more to be said.

You sent a link to search results, instead of science because there is none. You've been pulling this same stunt since 2020. Saying that you already dealt with this issue already so can't be bothered with it anymore, or sending useless links and never citing an actual valid study with a valid independent variable, valid methods and properly controlled.

♡ LIKE 💬 REPLY ...

So now you're resorting to personal attacks on my character, and we've been here too. You've done this before. And it never leads to the desired result. I will engage on these issues when and where the time is appropriate, in far more respectful rounds of rational discourse than you appear to believe this topic deserves and requires.

♡ LIKE 💬 REPLY (1)

Christine Massey FOIs Writes Christine Massey's "germ" FOI N... 1 hr ago

Personal attacks on your character? I simply pointed out your behaviour. You've had 3 years James, and it's one excuse after another. Don't share the science for me, share it for the world. If you can cite some valid science I'll gladly share it.
