Dear Del,

I hope this finds you well! Thanks for all your efforts to warn people of harm caused by quackcines!

You may have heard about my investigation into claims of viruses. I'd really appreciate your input. Attached are some papers wherein authors claimed to have isolated and sequenced the alleged "SARS-COV-2" (including the CDC paper, the Canadian paper and the earliest papers out of China).

 [Banerjee et al.pdf](#)

I have some questions for you and the ICAN team.

1. Have you read the Methods that were used in these papers, or in any other "SARS-COV-2 isolation/sequencing" papers? If so, do you consider them valid and scientific?

Keeping in mind that "SARS-COV-2" is said to be an infectious, replication-competent, obligate intracellular parasite that consists of a genome (of which there are millions of versions uploaded online) and a proteinaceous shell that is encoded by the genome, that spreads from host to host causing disease via natural modes of exposure...

2. Can you cite even 1 document (i.e. "isolation/sequencing" paper, "gain of function" paper, patent) wherein the scientific method was applied and the alleged "SARS-COV-2", or any other alleged virus, natural or man-made, was shown to exist?

If not:

- Why are you continually talking as though you know viruses exist?
- Why do you let governments and other perpetrators off the hook for having to prove the existence of alleged "viruses"? Why are you *"giving them the viruses for free"*?
- Why do you defend dogma that keeps people in fear, makes them easy to manipulate, and has been weaponized against humanity for a very long time?
- Will you please stop doing these things and lend support to the [Settling the Virus Debate statement?](#)
- The following essays are recommended reading for you and your colleagues:  
<https://drsambailey.com/the-covid-19-fraud-war-on-humanity/>  
<https://drsambailey.com/a-farewell-to-virology-expert-edition/>

To help with your answers, recall that scientific proof is not merely opinion, belief, speculation, and/or descriptive papers, and that scientific proof requires:

- Use of the scientific method
- Repeatable and falsifiable hypotheses that have been tested using valid, controlled experiments where only 1 variable differs between the experimental and control groups
- In this case, the 1 manipulated variable would be the presence/absence of purified particles suspected of being a virus
- Consistent results from valid, controlled experiments and procedures (i.e. identical "genomes", consistent in vivo effects).

Looking forward to hearing from you.

Thanks and best wishes,  
Christine Massey  
Ontario, Canada

Hi Del!

I hope you're doing well :)

Just wondering if you could please share your scientific evidence for "viruses"? There is a lot of curiosity on this topic! People around the world are learning about virology and wondering if there is any science behind any of it. If you have some, it's really important to let the world know!

Thanks in advance :)

Cheers!

Christine

Keep watching The HighWire- we are planning to have a show covering this topic very soon!

Hi Catharine and Del,

I don't actually watch the Highwire because I've done extensive research along with many other people and come to the conclusion that no "virus" has ever been shown to exist. Del and the Highwire, on the other hand, continue talking about them as though they do exist, along with pandemics, gain of function research and vaccines. Hence my questions.

Are either of you willing to answer?

Cheers,  
Christine

Greetings Catharine and Del,

I hope this finds you well :)

Are either of you willing to answer my questions? I'll be publishing your response or non-response, as the case may be, possibly later today.

Cheers,  
Christine

Hi Del,

I hope you're well. I'm following up for a couple of reasons.

During your recent talk with Neil Degrasse Tyson you complained that the scientific method died. But confusingly you also spoke of "*scientists*" being "*proven right*" in regards to "*this virus*" and "*variants*".

Catherine had told me on March 1st that you were "*planning to have a show covering this topic very soon*". But then in your rant about no-virus people (Ep 310, Highwire: <https://twitter.com/polybadger/status/1634006881080410119>) you pushed this discussion "*further down the road*". So I'm writing to ask for this scientific proof which must begin with the existence of the alleged virus and contagion.

Also, during your rant you equated virology being pseudoscience with Fauci being innocent and with no-virus people wanting to let Fauci and all covid perpetrators off the hook for all their crimes of the last 3 years.

I don't know where you got this idea but I can assure you that nothing could be further from the truth and in fact the opposite is true. Fauci and many other people around the world are complicit in crimes against humanity relating to fake-virus terrorism and carnage which began long before "covid". We want all of the fraud/delusion exposed (so that humanity never gets duped that way again and no longer lives in fear of imaginary pathogens) and we want the real crimes dealt with.

Hopefully you have already seen Tom Cowan's response to your rant; if not you can find the [2 minute clip](#) on his Facebook page (March 16).

Lastly, I'd just like to remind you that scientific method has nothing to do with consensus or with the pedigree of the scientists involved.

Best wishes,  
Christine
