Dear Christine,
This was the laughable response I received.
Cheers,
Tim

Subject: RE: FOI request CORRECTION

Dear Tim [REDACTED]

Thank you for your recent request. Public Health Wales has not produced any of the below mentioned material.
Please refer to the Public Health Wales disclosure log for previous FOI responses (FOI 850 - SARS-COV-2 virus records)

<https://www2.nphs.wales.nhs.uk/DisclosureLog.nsf/byMonthPage?OpenPage>

Thanks,
Alex

Subject: FOI request CORRECTION

WARNING: This email originated from outside of NHS Wales. Do not open links or attachments unless you know the content is safe.

To whom it may concern,

I would like to make a request for information you hold under the *Freedom of Information Act of 2000*.

Description of Requested Records:

All studies and/or reports in the possession, custody or control of Public Health Wales describing the **purification** of the alleged “**COVID-19 virus**” (aka “SARS-COV-2”, including any alleged “variants”) directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of **genetic** material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum).

Clarification of Request:

Please note that I am **not** requesting studies/reports where researchers failed to **purify** the suspected “virus” and instead:

- cultured something, and/or
- performed an amplification test (i.e. PCR), and/or
- fabricated a genome from sequences (allegedly) detected in an impure substance, and/or
- produced electron microscopy images of unpurified things.

I am already aware that according to virus theory a “virus” requires host cells in order to replicate, and am **not** requesting records that describe **replication** of a ‘virus’ without host cells. Nor am I requesting records that describe a strict fulfillment of Koch’s Postulates, or records where researchers conflate extraction of genetic material from a patient sample or cell culture with “virus isolation”, or records that describe a suspected “virus” floating in a vacuum, or private patient information.

I simply request records that describe **purification** (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Please note that my request includes any study/report matching the above description, **authored by anyone, anywhere**.

If any records match the above description of requested records and are currently available in the public domain, please provide enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Thanks in advance and I look forward to hearing from you soon.

Tim
