1600 Clifton Rd NE MS T-01
Atlanta, Georgia 30333
Email: FOIARequests@cdc.gov
Phone: 770-488-6277
Fax: 770-488-6200

Greetings Roger,

I require access to general records, as per the *Freedom of Information Act*.

Description of Requested Records:

1. All studies/reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) that scientifically prove/provide evidence of the existence of the alleged "**Alaskapox virus**" and/or the alleged "**cowpox virus**" (showing that the alleged particle exists and causes the illness/symptoms that it's alleged to cause).

Note:

Scientific proof/evidence is NOT

- Opinions, or
- Speculation, or
- Review papers, or
- Descriptive papers.

Scientific proof/evidence requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments.

2. **If the CDC has no studies responsive to #1 above**, then please indicate such explicitly, and provide all studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the **purification** of particles that are alleged to be said virus(es), directly **from bodily fluid/tissue/excrement of alleged "hosts", with purification confirmed via EM imaging** (the images must be available as well).

Please note that I am not requesting studies/reports where researchers failed to **purify** the suspected "virus" and instead:

- cultured an unpurified sample or other unpurified substance, and/or
- performed an amplification test (i.e. a PCR test), and/or
- created an in silico "genome", and/or
- produced electron microscopy images of unpurified things.

I am aware that according to virus dogma a "virus" requires host cells in order to replicate; I am not seeking records describing the replication of a "virus" without host cells, or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulate; I am simply seeking records that describe its purification (**separation from everything else in the "host" sample**). I am not seeking private patient records.

3. All studies/reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) that scientifically demonstrate **contagion of symptom(s) that are allegedly caused by said purported "virus(es)".**

General Note:

This FOI is **not limited** to records that were authored by the CDC or ATSDR or that pertain to work done at/by the CDC or ATSDR, it includes any record matching the above description authored by anyone, anywhere, ever.

Publicly Available Records

If any records match the above description of requested records and are currently available to the public elsewhere, please assist me by providing enough information about each record so that I may identify and access each one with certainty (i.e. title, author(s), date, journal, where the public may access it). Please provide URLs where possible.

Format:

Pdf documents sent to me via email; please don't ship anything to me;

Your CDC FOIA Request #24-00653-FOIA

xsj4@cdc.gov <xsj4@cdc.gov>
To: cmssyc@gmail.com

Tue, Feb 13, 2024 at 9:46 AM

February 13, 2024

Request Number: 24-00653-FOIA

Dear Ms. Massey:

This is regarding your Freedom of Information Act (FOIA) request of February 12, 2024, for:

1. All studies/reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) that scientifically prove/provide evidence of the existence of the alleged "Alaskapox virus" and/or the alleged "cowpox virus" (showing that the alleged particle exists and causes the illness/symptoms that it's alleged to cause).
2. If the CDC has no studies responsive to #1 above, then please indicate such explicitly, and provide all studies and/or reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) describing the purification of particles that are alleged to be said virus(es), directly from bodily fluid/tissue/excrement of alleged "hosts", with purification confirmed via EM imaging (the images must be available as well).
3. All studies/reports in the possession, custody or control of the Centers for Disease Control and Prevention (CDC) and/or the Agency for Toxic Substances and Disease Registry (ATSDR) that scientifically demonstrate contagion of symptom(s) that are allegedly caused by said purported "virus(es)".

Please see the attached letter.

Sincerely,
CDC/ATSDR FOIA Office
770-488-6399

February 13, 2024

Ms. Christine Massey

Via email: cmssyc@gmail.com

Dear Ms. Massey:

The Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) received your Freedom of Information Act (FOIA) request dated February 12, 2024. Your request was assigned #24-00653-FOIA and placed in our complex processing queue.

Extension of Time

In unusual circumstances, an agency can extend the twenty-working-day limit to respond to a FOIA request.

We will require more than thirty working days to respond to your request because:

- We reasonably expect to consult with two or more Centers/Institutes/Offices,

If you have any questions or wish to discuss reformulation or an alternative time frame for the processing of your request, please contact the analyst handling your request Rochelle Carpenter at , or our FOIA Public Liaison, Bruno Viana at 770-488-6246. Additionally, you may contact the Office of Government Services (OGIS) to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services; National Archives and Records Administration; 8601 Adelphi Road-OGIS; College Park, Maryland 20740-6001; e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

Fee Category

Because you are considered an "Other requester" you are entitled to two hours of free search time, and up to 100 pages of duplication (or the cost equivalent of other media) without charge, and you will not be charged for review time. We may charge for search time beyond the first two hours and for duplication beyond the first 100 pages. (10 cents/page).

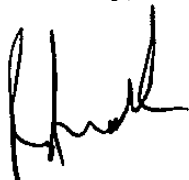

Cut-off-date

If you don't provide us with a date range for your request, the cut-off date for your request will be the date the search for responsive records starts.

You may check on the status of your case on our FOIA webpage <https://foia.cdc.gov/app/Home.aspx> and entering your assigned request number. If you have any questions regarding your request, please contact Rochelle Carpenter at xsj4@cdc.gov.

We reasonably anticipate that you should receive documents by May 5, 2024. Please know that this date roughly estimates how long it will take the Agency to close requests ahead of your request in the queue and complete work on your request. The actual date of completion might be before or after this estimated date.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Andoh', with a stylized, cursive script.

Final Response to Your CDC FOIA Request #24-00653-FOIA

xsj4@cdc.gov <xsj4@cdc.gov>
To: cmssyc@gmail.com

Thu, Feb 29, 2024 at 10:16 AM

February 29, 2024

FOIA Request Number: 24-00653-FOIA

Dear Ms. Massey:

This is regarding your Freedom of Information Act (FOIA) request of February 12, 2024. Our final response letter is attached.

Please see the attached letter.

Sincerely,
CDC/ATSDR FOIA Office
770-488-6399

 **Final Response Letter - FOIA Request 24-00653-FOIA.pdf**

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Public Health Service

Centers for Disease Control
and Prevention (CDC)
Atlanta GA 30333

February 29, 2024

Ms. Christine Massey

Via email: cmssyc@gmail.com

Dear Ms. Massey:

This letter is in response to your Centers for Disease Control and Prevention and Agency for Toxic Substances and Disease Registry (CDC/ATSDR) Freedom of Information Act (FOIA) request of February 12, 2024, for:

1. All studies/reports in the possession, custody or control of the CDC/ATSDR that scientifically prove/provide evidence of the existence of the alleged "Alaskapox virus" and/or the alleged "cowpox virus" (showing that the alleged particle exists and causes the illness/symptoms that it's alleged to cause).
2. If the CDC has no studies responsive to #1 above, then please indicate such explicitly, and provide all studies and/or reports in the possession, custody or control of the CDC /ATSDR describing the purification of particles that are alleged to be said virus(es), directly from bodily fluid/tissue/excrement of alleged "hosts", with purification confirmed via EM imaging (the images must be available as well).
3. All studies/reports in the possession, custody or control of the CDC/ATSDR that scientifically demonstrate contagion of symptom(s) that are allegedly caused by said purported "virus(es)".

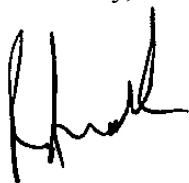

Personnel from CDC/ATSDR's National Center for Emerging and Zoonotic Infectious Diseases (NCEZID) conducted a search for records responsive to your request. Unfortunately, a search of our records failed to reveal any documents pertaining to your request. Per the NCEZID, years ago, a former CDC employee published an article concerning the Alaskapox virus and the URL is here:
<https://www.ncbi.nlm.nih.gov/pmc/articles/PMC5447873>.

You may contact our FOIA Public Liaison at 770-488-6246 for any further assistance and to discuss any aspect of your request. Additionally, you may contact the Office of Government Information Services (OGIS) at the National Archives and Records Administration to inquire about the FOIA mediation services they offer. The contact information for OGIS is as follows: Office of Government Information Services, National Archives and Records Administration, 8601 Adelphi Road-OGIS, College Park, Maryland 20740-6001, e-mail at ogis@nara.gov; telephone at 202-741-5770; toll free at 1-877-684-6448; or facsimile at 202-741-5769.

If you are not satisfied with the response to this request, you may administratively appeal to the Deputy Agency Chief FOIA Officer, Office of the Assistant Secretary for Public Affairs, U.S. Department of Health and Human Services, via the online portal at <https://requests.publiclink.hhs.gov/App/Index.aspx>.

Please mark both your appeal letter and envelope "FOIA Appeal." Your appeal must be electronically transmitted by May 29, 2024.

Sincerely,

A handwritten signature in black ink, appearing to read 'R. Andoh', with a stylized flourish at the end.

Roger Andoh
CDC/ATSDR FOIA Officer

Final Response to Your CDC FOIA Request #24-00653-FOIA

Christine, an unincorporated woman <cmssyc@gmail.com>
To: xsj4@cdc.gov, "FOIA Requests (CDC)" <FOIARequests@cdc.gov>

Sat, Mar 2, 2024 at 3:08 PM

Thank you "xsj4" and Roger.

Regarding the "Alaskapox virus" article cited:

The 2017 study supposedly reports on a "**Novel Orthopoxvirus Infection in an Alaska Resident**", and begins with some fear-mongering around cessation of smallpox "*vaccination*" and the supposed waning of population-level "*immunity*"

The authors then claim that a "*virus*" has been "*isolated*" from a woman's dermal lesion "*consistent with poxvirus infection*" and that laboratory testing has "*confirmed infection by an Orthopoxvirus*". The woman had been unwell for several days, suspected that she had been bit by spider and "*denied*" having been around any sick people.

The woman's doctor suspected a "*viral infection*", so he swabbed a vesicle, put the swab into universal transport media and sent the swab to the Alaska State Public Health Virology Laboratory for **culture** and **diagnostic testing**.

Testing at this point is obviously putting the cart before the horse because we're looking for scientific evidence of a "virus" existing and you cannot have a validated test for something that hasn't already been shown to exist.

Re "culture"/"isolation": the content of the swab was intentionally, unscientifically adulterated by adding it to various cell lines. Other basic details of the "culturing" process were omitted/concealed by the authors and they don't even hint at having implemented any controls (because virology isn't a science).

The cell lines started breaking down ("cytopathic effects"), probably caused by malnutrition/poisoning since this is the norm in virology, and this was irrationally, ludicrously passed off as a "virus" having been "isolated".

Two weeks later the original swab sample and the fake "isolates" were sent to the Poxvirus Laboratory of the Centers for Disease Control and Prevention where a never-validated "Orthopoxvirus-generic" PCR test gave meaningless "positive" results.

(**PCR** can only provide indirect evidence of a target sequence, not intact "germs", and no "orthopoxvirus" has ever been shown to exist anyways.)

Tiny things were seen in electron microscopy images **after the culturing had been done** (not in the contents of the swab). These tiny things were delusionally passed off as "*the virus isolated from the patient*"... despite the fact that nothing whatsoever had been isolated/purified let alone sequenced, characterized and studied with valid controlled experiments to see if it really was a "virus". The classic "point and declare" method, minus the arrows.

Figure 1.

A, B, Patient's lesion on 29 July 2015 (A) and 20 August 2015 (B). C-E, Electron microscopic images of the virus isolated from the patient showing crescents (C), spherical immature virus in virus factories (D), and A-type inclusion bodies occluded with mature virus in infected cells (E).

Supplementary Methods

Transmission electron microscopy: Virus morphology was observed from the original swab cell culture (BSC40) by using transmission electron microscopy. Twenty-four hours postinfection, BSC40 cells were harvested and the cell pellet was fixed by using buffered glutaraldehyde and subsequently processed for thin-section electron microscopy [4].

From the **Supplementary Methods** we see that fake/fraudulent “whole genome sequencing” was based on DNA extracted from the original **cell culture** (and God only knows how many different sequences) - which was never shown to have anything to do with a “virus” - and meaningless “*phylogenetic inference*” was performed.

The authors don't provide details of the universal transport medium that the swab was stored in prior to any lab work being performed. However we know that the CDC's **Standard Operating Procedure** for “viral” transport medium in the context of fake-covid includes the intentional, unscientific adulteration of clinical samples with cow serum, toxic drugs, etc. (screenshot below) and that universal transport mediums can adulterate clinical samples with bovine serum albumin, antibiotics, etc. (i.e. see **Copan Diagnostics Inc., Murrieta, CA, USA.**)

There's more but I trust you get the picture: no valid independent or dependent variable, un-validated indirect tests, invalid methods that tell us nothing about living bodies, no scientific evidence.

Christine
